Social Profiles:		

The Blue Checkmark on Etherscan represents a token or project of public interest. The token page with The Blue Checkmark is also displayed first and more prominently during a search on Etherscan, prioritizing a genuine token while showing all tokens with similar names.

### What are the requirements to obtain The Blue Checkmark?

Etherscan evaluates multiple factors but not limited to the criteria below in determining if a token project is of the public interest:

- The contract source code must be verified
- The token project must represent a known & public interest project
- The token project must maintain a working website with active social profiles and communication channels
- The token project has operated for a period in time and achieved certain milestones
- The token project remains active and has ongoing on-chain activities
- The token project is well known and often interacted.

*Not all public and well-known projects on Etherscan awarded the Blue Checkmark.*
